RELEASE DATE: W/C MARCH 3, 2014

XRY 6.9 RELEASE NOTES

XRY

NOW WITH 11,511 DEVICE PROFILES SUPPORTED

V6.9 HIGHLIGHTS

- Enhanced Logical extraction of iDevices.
- Improved SQLite Decoding.
- More decoded data from Nokia devices.
- Increased app support.

Forensic Method	v6.9	Total
XRY Logical	257	4,797
XRY Physical Dumping	312	2,507
XRY Physical Decoding	309	2,426
Security Code Only	6	810
Smartphone Apps	15	163
XRY Untested	57	808
Total	**956**	**11,511**

IMPROVED SQLITE DECODING

VERSION 6.9 OF XRY includes a new method for decoding deleted SQLite data extracted from platforms, such as Android and iOS. The new method recovers deleted data even if all data has been deleted from a database. Decoded deleted data include call logs, SMS, MMS contacts, etc. Data from many popular apps, such as KakaoTalk, LINE, SeeCrypt, Skype, TigerText, Viber and WhatsApp is also included. This method not only decodes more data, it also reduces the risk of getting corrupt data.

XRY Kiosk

XRY KIOSK 6.9 IS NOW RELEASED

The forensic tool designed for first responders

XRY PinPoint

NEW SOLUTION FOR NON-STANDARD MOBILE DEVICE SUPPORT

XRY PINPOINT is not just another Chinese chipset solution. It is an advanced solution which comprises compact hardware and powerful software. The solution enables the user to extract data from non-standard mobile devices. It is fully integrated with XRY and uses the familiar and easy to use interface of the application. This allows the user to take advantage of the powerful decoding functionality of XRY. XRY PinPoint is primarily a software solution and is therefore easy to update in future versions of XRY.

In the 6.9 release XRY PinPoint supports devices with chipsets from MediaTek and Spreadtrum. In addition to the verified device profiles in XRY, there are also generic profiles that allow the solution to work with even more devices. The hardware is very compact and is well-suited to work in the field.

XRY PinPoint is the latest addition to Micro Systemation's suite of forensic tools and is released in conjunction with version 6.9 of XRY. It runs on a separate license and requires the user to have a Physical or a Complete license. For more information please contact sales@msab.com or visit **msab.com/xry/pinpoint**.

ENHANCED LOGICAL EXTRACTION OF iDEVICES

THE NEW METHOD RECOVERS more system and user application data than ever before. This is done without the need to jailbreak the iDevice upon examination. The new version of Logical extraction supports any iOS version on any iDevice. A requirement is that the iDevice is not passcode locked, or if the Lockdown file can be found.

With XRY version 6.9 the amount of deleted SQLite data, such as SMS, MMS and iMessage, has vastly improved. Even if the iDevice has iTunes Backup Encryption enabled, XRY 6.9 is able to extract and decode deleted SQLite data.

INCREASED APP SUPPORT

VERSION 6.9 OF XRY OFFERS support for 15 new apps and updates for 40 already supported apps. This ensures that users have access to data from the most popular apps, current versions as well as older versions.

MORE DECODED DATA FROM NOKIA DEVICES

New decoding of some 50+ Nokia phones has been added to XRY 6.9. Physical extraction now gives you data such as, SMS, MMS, e-mail, contacts, calls, events, notes and tasks.

WHAT'S NEW IN THIS VERSION?

COMMON EXTRACTION FEATURES

- The "Save file" dialog has a new GUI. It now allows the creation of a new folder by typing the folder name in the path.
- Feature documentation for Logical support in the XRY Device Manual (which is also available in the Extraction Wizard) has been updated. Pictures, video etc. has been merged to Files. Calendar, tasks, notes now appear together in Calendar. To the benefit of the user feature documentation for Logical and Physical now follow the same structure.

ANDROID

- The Android Decoder now decodes more than one logical image in one XRY file. Users may extract first through the backup method followed by the agent method, creating two images in one XRY file.
- Contacts and installed apps cache from Google Search decoded.
- Thumbnail image decoding.
- *New Apps:* BlackBerry Messenger (1.0), Firefox (21.0), Garmin Mechanic (1.2.1), GIF Chat (1.2.1), Google Keep (2.0.35), Instagram (5.0.1), LinkedIn (3.2.1), Opera Mini Browser (7.5.3), Pinterest (2.1.4), TextNow (1.1.1), Tumblr (3.5.4).
- *Updated Apps:* Evernote (5.7), Facebook (4.0.0), Facebook Messenger (3.2.3), GMail (4.7.1), GMail (4.7.2), Google+ (4.2.4), Hangouts (2.0.217), Kik (7.0.0.69), Line (3.8.7), NQ Mobile Vault (5.0.02), Skype (4.5.0), Tango (3.2.67659), Tango (3.3.71425), WeChat (5.1), WhatsApp (2.11.152), Viber (4.2.0.1656).

iOS

- Support for iOS7 keychain data decoding.
- Corrected problem with keyboard cache decoding on Chinese/Japanese locales.
- Apple Network Usage.
- Thumbnail image decoding.
- *New Apps:* Apple Voice Memos, BlackBerry Messenger (1.0.3.120), Chrome (31.0.1650.18), Gmail (1.3.1415), Gmail (2.71828.0).
- *Updated Apps:* CoPilot (9.5.0.435), Evernote (7.3.0), Facebook (6.8), Facebook (7.0), Facebook Messenger (3.1.1), Garmin (2.7), Google Maps (2.5.3), Google Mobile (3.2.0), Instagram (5.0.2), Kik Messenger (6.8.1.75), Kik Messenger (7.0.0), Navfree GPS Live (2.3.46), Navigon MobileNavigator (2.7), Nike+ GPS (4.5.0), RunKeeper (4.2.2), Skype (4.17.124), Snapchat (6.1.2), Tango (3.3.69998), TomTom (1.16), Twitter (6.0.2), WeChat (5.0.3.17), WhatsApp (2.11.7), Viber (4.1.1).

PHYSICAL FEATURES

- Improved decoding of Samsung SCH-WXXX CDMA/GSM phones. XRY now offers support for Contacts, Calls, Calendar, Tasks, Notes, Alarms, Unlock code (decoding, 6 devices).
- Updated decoding support for Samsung PNX phones. Improvements include Calls and Contacts as well as IMSI decoding.
- Several improvements to XSR flash decoding. This will give full system support on a large number devices which earlier were partially supported.
